Burial List from the New Burial Ground

The following list has been compiled by Orion Heritage following an appraisal of the Burial Records held at Hounslow Register Office [HRO]. The Hounslow Register Office [HRO] holds several registers relating to the burial ground at St Lawrence New Brentford which have been used to compile this list:

- Register of Burials 1884-1911
- Register of Burials (copy) 1843-1973
- Register of Graves 1884 – 1948 [1973]

The Hounslow Register Office [HRO] and the London Metropolitan Archives also hold copies of a 1930 plan of the new burial ground made by E Willis which contains named plot numbers. Two challenges to identifying the numbers of, and location of, burials have been found:

- discrepancies can be found between ALL of the documents
- the 1930 plan is the only plan identified so far; and several plot numbers appear within the registers that are not marked on the plan [see below]; although many marked 'Xa' or 'Xb' can be assumed to be adjacent to corresponding plot 'X'.

In approximately 55 instances it has not been able to allocate a named individual to a burial plot. There are also named burial plots on the 1930 plan which do not have corresponding burial records. Further checking of the original records may be required/requested to check if the location of the burial can be discerned by documentary research. All enquiries will be registered in the event that new information comes to light during the on-going works.

Gravestones

A pile of gravestones was recorded, in the west of the new burial ground. None of these were in situ and no in situ gravestones were encountered during the 2019-2020 archaeological evaluation works (MOLA 2020a). The following provides a list of the inscribed fragments. These have been photographed and added to the catalogue. The following list relates to only those that date from the new burial ground and will be removed as part of the proposed works. The subsequent list relates to those that date to the old cemetery and will remain at the old cemetery for the time being. Included on both lists are undated fragments which may relate to either cemetery.

The broken gravestones will be inspected and moved under archaeological supervision. Non-diagnostic fragments will be separated, quantified and stored separately away from the investigation area. Diagnostic / engraved fragments will be stored away from the investigation area and arranged to allow photographing and cataloguing.

All broken monuments will be added to the monument inventory (which covers both the graveyard and church) to assess the possibility of clarifying inscriptions/repair of some of the markers/material.

All diagnostic / engraved gravestone fragments will be stored on site for the duration of the Phase I works.

The monument list and associated high quality photographic archives will form part of the final report and archive which will be submitted to LAARC.

In the event that a well preserved gravestone can be associated with an individual burial, relocation of the gravestone to the proposed burial place will be explored.

Retention of well-preserved gravestones with a local archive will be explored. If not possible, gravestones can be offered to the appropriate denominational authority for disposal as that authority seeks fit. If not accepted by that authority "shall be broken and defaced before being disposed of otherwise" (Section 14 Town and Country Planning Regs 1950, churches, places of worship and burial grounds). This may involve reburial at Brookwood cemetery.
